

FOR IMMEDIATE RELEASE

ACG Inspection Systems acquires Croatian company IN2trace

April 26th 2017, Mumbai

As part of its strategic international expansion plan, ACG Inspection Systems, one of the global leaders in pharmaceutical track & trace, has acquired Croatia based serialization enterprise company IN2trace Ltd., for an undisclosed amount.

Speaking on the occasion, ACG Inspection Systems, CEO Ettore Cucchetti said “Acquiring IN2trace is another key step towards consolidation of our global footprint in the track & trace business. It creates a strong manufacturing, support and development base for ACG Inspection in Europe, increases our serialization expertise and expands our enterprise level product portfolio. We see this acquisition as a key driver for the adoption of advanced serialization technology by pharmaceutical manufacturers.”

Commenting on the acquisition, IN2trace Managing Director Kresimir Duracic added, “This is a great opportunity to increase our penetration within the global pharmaceutical industry. Our IN2trace serialization framework provides full regulatory compliance, includes warehousing solutions and integrates with 3rd party cloud solutions.”

As part of the acquisition, ACG Inspection Systems has acquired all the assets and IP of IN2trace, part of the IN2 group. ACG Inspection Systems is a wholly owned group company of ACG. The company plans to set up an additional office close to Zagreb airport and rapidly ramp up development, manufacturing and service operations.

The ACG group also has a large operation in Croatia with ACG Lukaps, a leading manufacturer of hard capsules and a major supplier to pharmaceutical companies in Europe and Russia. IN2 group and ACG Inspection System plan to partner on future developments for the pharmaceutical industry. IN2 group will continue developing and implementing serialization solutions for non-pharma industries including food and beverage, tobacco, electronics and automotive, etc.

About ACG

ACG is a global supplier of integrated manufacturing solutions for leading pharmaceuticals and nutraceutical companies. ACG offers an end-to-end range of products that cover both consumable materials and production equipment.

ACG manufactures more than 80 billion capsules and 18,000 tons of blister packaging film every year. With an installed base of over 20,000 granulation, encapsulation, tablet forming, tablet coating, blister packing, cartoning, track & trace and inspection machines, ACG serves customers in 100 countries through its network of 15 global manufacturing facilities.

ACG works hand in hand with customers to create advanced dosage delivery & packaging solutions for any capsule or tablet based product. By applying strong values, an ethical focus and continuous innovation, ACG's customer centric approach to business is recognized and valued around the world.

About IN2 group and IN2trace

IN2 group was established in 1992 in Zagreb, Croatia and is today one of the biggest software companies in Central and Eastern Europe. The company specializes in development, implementation and support of customized software solutions, IN2 proprietary products and standard software solutions, both for public and private sector. IN2 group employs more than 600 technical experts in 13 companies, based in 6 countries in the region.

IN2trace Ltd, a member of the IN2 group, is focused on serialization solutions. The IN2trace serialization framework solves regulatory issues while improving the user experience, enhancing brand loyalty and increasing the security of its customers' products.
