Laboratory Total Organic Carbon Analyzer

SIMPLE. RELIABLE.

The new QbD1200 TOC analyzer is designed to make testing easier, reproducible and accurate. The new TOC analyzer eliminates the dependency on lengthy overnight routines that may fail. In the first of its kind the QbD1200 TOC analyzer calibrates in only 90 minutes. The QbD1200 is designed for use in 21 CFR part 11 lab environments and is fully compliant with all global pharmacopeia regulations.

A PERFECT PAIR.

Measuring samples as small as 65 µL and returning results in just 35 seconds, our new Vi-CELL MetaFLEX bioanalyte analyzer evaluates pH, pO2, pCO2, glucose, lactate, electrolytes and more. With less maintenance, more reliability and a surprisingly small footprint, it’s a sophisticated research solution that profiles test samples quickly, easily and accurately.
